

The Project for Strengthening Environmental Management in Petroleum Industry in Persian Gulf and its Coastal Area

*Ides Inc. participated in this Project as an associate member of the main contractor.

Project Outline

Client: Japan International Cooperation Agency

Period: September 2012 - December 2013

Objective: The objective of the Project is to strengthen the management capabilities for marine and coastal environment in the petroleum industry in Iran.

The Project aims:

- (1) To review and analyze the current marine and coastal environmental management and emergency response preparedness on potential oil spill event,
- (2) To formulate draft Master Plans for improvement of the marine and coastal environmental management system and oil spill emergency response system, and
- (3) To transfer the advanced technologies for the environmental management and effective response to the possible accidental oil spill to the Iranian side through implementation of the Project.

Main Activities

Assigned fields: Environmental Management Plan 3 (Establishment of EMP)

Summary of activities:

- Confirmation of legal framework, environmental standard related to EMP (HSE: Health, Safety and Environment)
- Setup of temporal environmental management goal (5-year period)
- Study for environmental (HAE) policy, management system and organizational structure
- Preparation of master plan for environmental management
